Max. Power Consumption	< 200 watts
Limited Parts Warranty	3 years

How We're Different

Ultimate Portability Take any job on with confidence. The SN1812's light weight allows you to take the machine anywhere!

Open Architecture No base restrictions allows you to place the tabletop model on virtually any surface - from flooring to large furniture pieces.

Plug and Play Unlike many other machines, AP Lazer plugs directly into a common 110v electrical outlet.

The portability of this machine has taken my business to another level. I take it with me to shows of all kinds - it allows me to engrave on-the-spot - and that's something my competitors can't do.

Cutting Edge Possibilities

- › Custom flooring
- › Marble and stone
- › Electronics
- › Toys and games
- › Trophies and awards
- › Wood engraving and cutting
- › Stone and marble engraving
- › Custom furniture pieces
- › Decorative features
- ...And much more!**
